Subject: water on Hollyville Rd. near Mountaire

Hi Jack,

I wanted to pass this along to you. We have folks on Hollyville Rd. whose water has not been tested by DNREC or Sharp/Culligan. They would like DNREC to sample their well. They last \$4 test put them just under 10 (9.7) for nitrates but this fluctuates. They would like to be supplied water by Mountaire as their family consumes and cooks with this water daily. I am copying [REDACTED] here so he will have your contact information.

Thank you, in advance.
